Summary

A Cloud Engineer with extensive experience in integration solutions, cloud infrastructure management, Backend and API development. Specializing in Dell Boomi, REST API design, and Terraform for cloud infrastructure creation and maintenance. Proven skills in team management and project execution, **complemented by Google Cloud, Azure and Dell Boomi Cloud certifications**. Strong experience with Java Spring Boot, designing and developing both microservices and monolithic applications. Prior experience as a Full Stack Developer, focusing on PHP/Laravel Backend and API development, database design and implementation, and front-end development with Laravel Blade and Vue.js. **Personal Interests LLMs and prompt engineering.**, and experiments with the latest AI-agent tools (e.g., Cline, Codex, Claude Code) to improve work quality and reduce development time, always adhering to defined security and architectural best practices.

Skills

- Communication skills
- Prompt Engineering
- Design Patterns
- Databases (SQL, NoSQL)
- Git flow
- Java
- Spring boot
- Python
- Kafka / Cloud messaging / event bus
- Php
- Laravel
- Javascript / node js
- VueJs
- React
- Terraform
- Continuous Learning
- Keycloak
- JWT
- Liferay

Experience

Arhs Development (Part of Accenture)/ Senior software engineer

Jan 2026 - PRESENT, THESSALONIKI (Hybrid)

- Co-Leading the development of a new feature for European Union in an existing liferay java environment
- Architecture design, code reviews, database design

Deloitte / Cloud Engineer

MAY 2021 - DEC 2025, THESSALONIKI (REMOTE)

- Design and Implement Backend solution for the Public Sector, design the microservices structure, communication and document the process and the guidelines for further development.
- Working on the backend in the banking sector for ECB.
- Build end to end integration solutions using Dell Boomi, managing a team of 3 engineers in a variety of projects related to integration.
- Design, Document and Implement REST api for IoT project.
- Develop, refactor and maintain Cloud Infrastructure using terraform.
- Develop, refactor and maintain Microservices and monolithic

applications with java spring boot.

Inspot HQ / FullStack Developer
FEB 2020 - NOV 2020, THESSALONIKI (Hybrid)

- Develop APIs using php/laravel for the igaming industry.
- Design and implement Database relationships
- Build frontend components with Laravel blade and VueJs

Education

IHU / Msc of Applied Informatics (in-progress)

IHU / Bsc Of Software engineer, Computer Science

High School / Assistant of Software Engineer

Interests

LLMs, AI-Agents, Prompt Engineering, RAG, Big Data, Natural Language Processing, Machine Learning, Software Architectures, Cloud Solutions.
